

Strong Two Factor Authentication

FIDO U2F

Fido U2F is the standard now adopted by Google and others!

Strong Encryption

256-bit public-key encryption eliminates cloning.

Touch Button

Touch to prove you're really there! Stops internet hackers.

Confirmation LED

Green confirmation LED flashes for known-good websites.

Die-cast Metal Case

Solid metal case can survive your keychain and pocket.

Cost Effective

Most value vs security ratio compared with other security solutions.

U2F Advantages

U2F is an open authentication standard that enables internet users to securely access any number of online services, with one single device, instantly and with no drivers or client software needed.
